***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 12, 2004 has been entered.

**REASONS FOR ALLOWANCE**

Claim 22 is allowed based on the limitation of "measuring **simultaneously** instantaneous intensity of the radiation..." in combination as currently claimed. While the previously applied prior art of Shirk US 5,651,903 and Chou et al. US 5,961,859 disclose directing, measuring and comparing steps comparable to that claimed by applicant the spatial shapes determined in these methods are based upon measurements performed as a function of time (see figure 2 of Shirk and figure 8 of Chou et al.) This is in contrast to the measurement technique of applicant in which the spatial shapes of two spaced apart peak intensity regions of the radiation emitted from the vapor capillary and of a minimum intensity region that is formed between the two peak-intensity regions are obtained by a simultaneous measurement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
